*Explanation concerning appropriate use of projected operating results and other special remarks

The forward-looking statements, including business results forecasts, contained in these materials are based on information currently available to the company and on certain assumptions deemed to be reasonable. Actual business results may differ substantially due to a number of factors. For information concerning the assumptions used for the above projections and matters to note when using the projected operating results, please see pages 3 through 5, "1. Operating Results (1) Analysis concerning operating results."

1. Analysis of Results of Operations

(1) Overview of the Current Period

During the current consolidated period,

During the consolidated fiscal year under review, the economy of Japan experienced the first signs of relief from the dramatic recession since last year's global financial crisis. However, corporate capital investment declined significantly, and the economic outlook remains murky.

Demand for LCD panels in the LCD industry remained sluggish in the first half of the fiscal year, affected by the global economic downturn. This created difficult conditions in which panel manufacturers significantly curtailed output, and overseas panel manufacturers reduced, postponed or cancelled plans for new manufacturing lines.

During the latter stages of the first half of the fiscal year, the government of China adopted a special "home appliance in the countryside" policy in that country. This led to a steady recovery in utilization rates for Taiwanese and Korean panel manufacturers. This also caused a sudden shortage in the supply of glass substrate, a key material in panel manufacturing, creating delivery delays for LCD panels.

Sharp Corporation started operations of its 10th generation LCD panel factory in Sakai, Osaka Prefecture about six months earlier than initially planned, beginning mass production from October 2009. The operations of other major panel manufacturers have likewise began a rapid recovery.

Given these market developments, the SK-Electronics Group began full-scale operations at our Shiga Plant (next-generation large-scale photomask manufacturing plant) in March 2009, continuing to ship 10th-generation photomasks in response to steady demand. However, demand for 8th-generation and earlier photomasks has remained weak, as panel manufacturers have limited or curtailed capital investment. We have also experienced a greater-than-expected decline in unit prices due to intensified competition both domestically and overseas. Because of the dramatic decrease in demand for small- and medium-sized photomasks in Japan over the past several years, the SK-Electronics Group has revised investment plans related to production for small- and medium-sized photomasks. We have recorded ¥306 million in loss on retirement of fixed assets as extraordinary losses. Furthermore, as a result of verifying the probability of recovery based on future received earnings from assets such as small and medium-sized photomask manufacturing facilities, we reduced the book value of certain assets including manufacturing facilities for some small and medium-sized type photomask production lines, including the Company's lease assets, to the recoverable value, and reported a ¥697 million extraordinary loss for the write-downs in question as an impairment loss. Finally, considering the change in operating results during the period, we also prudently examined the recoverability of deferred tax assets. Since we cannot expect a commensurate amount in taxable income, we have written off the entire amount of deferred tax assets, recording said amount as adjustments for corporate and other taxes.

As a result, the SK-Electronics Group experienced an increase in revenue and a decrease in profits compared to the prior fiscal year. Net sales amounted to \$18.682 billion, while the Group recorded an operating loss of \$675 million and an ordinary loss of \$872 million. Net loss for the consolidated fiscal year under review amounted to \$2.011 billion.

By product, net sales of TFT photomasks for the consolidated fiscal year under review amounted to \$8.433 billion. Net sales of other photomasks experienced a marked increase, amounting to \$10.248 billion. This was mainly due to increased test mask and CF photomask production associated with the utilization of the Shiga Plant.

| (Reference) Change in Photomask Sales by Product Type (Unit: Millions of yen | (Reference) | Change ir | n Photomask | Sales by | Product Type | (Unit: Millions of y | ven) |
|------------------------------------------------------------------------------|-------------|-----------|-------------|----------|--------------|----------------------|------|
|------------------------------------------------------------------------------|-------------|-----------|-------------|----------|--------------|----------------------|------|

| TFT | 2,302 | 2,640 | 2,577 | 2,310 | 1,549 | 1,032 | 3,062 | 2,789 |
| Others | 1,662 | 1,684 | 1,859 | 2,124 | 1,404 | 1,759 | 3,383 | 3,702 |
| Total | 3,964 | 4,324 | 4,437 | 4,437 | 2,953 | 2,792 | 6,445 | 6,491 |

By geographic segment, domestic net sales for the consolidated fiscal year under review increased significantly to reach \$12.014 billion—mainly due to strong demand for next-generation photomasks out of our Shiga Plant. Overseas, net sales were substantially lower than the prior fiscal year, amounting to \$6.667 billion.

(Reference) Change in Photomask Sales by Geographical Segment (Unit: Millions of yen)

2 Outlook for the Next Period

Looking over the mid- to long-term, we expect an increase in demand for large-format photomasks. This expectation is based on expanded demand in the market for LCD televisions from LCD panel manufacturers overseas, who will invest in new lines to handle requirements for larger panels. New uses and applications for LCD panels will continue to develop, also contributing to stronger demand.

We expect that there will be differences in the timing of new production line launches depending on LCD panel maker earnings. With the operation of the Sharp Corporation 10th-generation largeformat panel plant, we believe that there will be an increase in the number of new 8th-generation lines and facilities at overseas manufacturers, and a general increase in call for large-format photomasks over the next fiscal year.

Given this environment, the SK-Electronics Group led the industry in building a next-generation (10th-generation and beyond) large-format photomask manufacturing plant ("Shiga Plant"), launching operations in March 2009, and establishing a position as a leading company in the photomask market. Projecting a further decline in consumer unit prices for LCD television sets, LCD panel manufacturers are pressuring suppliers to lower component costs—pressure that continues to affect unit prices for photomasks.

The SK-Electronics Group continues to adopt fundamental cost-cutting measures in response to this difficult operating environment. In addition, we are working to differentiate our offerings from our competitors, introducing technological proposals based on our understanding of customer needs, and increasing the speed with which we can react through the close coordination of sales, technology, production and management functions within the Group.

With the operation of our Shiga Plant, we project consolidated net sales for FY 2010 to reach \$24.4 billion, representing a 30.6% year-on-year increase. We project non-consolidated net sales of \$22.3 billion, representing a year-on-year increase of 29.2%. The Group forecasts consolidated ordinary income of \$150 million, and non-consolidated ordinary income of \$100 million.

We ask for your continued support as we continue to expand as a leading company in the LCD glass substrate photomask industry.

(2) Analysis of Financial Condition

1) Assets, Liabilities, and Net Assets

Total assets increased \$6.516 billion compared with the end of previous consolidated fiscal year to \$32.226 billion. This increase was mainly due to an increase in net sales associated with the full-scale operation of our Shiga Plant, resulting in an increase of notes and accounts receivable. In addition, we recorded an increase in assets for increase in buildings and structures, and machinery, equipment and vehicles related to construction of the Shiga Plant.

Total liabilities increased \$9.41 billion compared to the end of the prior consolidated fiscal year to \$21.911 billion. This mainly reflected a higher amount of long-term loans payable.

Total net assets decreased by \$2.894 billion compared with the end of the prior consolidated fiscal year, to \$10.315 billion. This was mainly because of a decrease in retained earnings and foreign currency translation adjustments.

2)Cash Flow

Cash and cash equivalents ("Cash") for the consolidated fiscal year under review increased by \$245 million compared with the end of previous consolidated fiscal year to \$2.413 billion.

(Cash Flows from Operating Activities)

Cash flows from operating activities during the consolidated fiscal year under review totaled \$1.563 billion (year-on-year decrease of \$3.004 billion). This amount was mainly due to a loss before income taxes and minority interests of \$1.921 billion (year-on-year decrease of \$2.671 billion), depreciation and amortization expense of \$5.545 billion (year-on-year increase of \$2.879 billion) and an increase in accounts receivable of \$4.372 billion (year-on-year increase of \$5.060 billion).

(Cash Flows from Investing Activities)

Cash flows used in investing activities during the consolidated fiscal year under review totaled \$8.479 billion (year-on-year increase of \$3.945 billion). This mainly reflected \$8.472 billion of funds used for the purchase of tangible fixed assets (year-on-year increase of \$4.281 billion).

(Cash Flows from Financing Activities)

Cash flows from financing activities during the consolidated fiscal year under review increased to \$7.272 billion (year-on-year increase of \$6.669 billion). This mainly reflected an increase in cash provided by long-term loans of \$10.4 billion (year-on-year increase of 7.8 billion) and cash outlays of \$2.588 billion (year-on-year increase of 909 million) in repayments of long-term loans.

* Equity Ratio: Owned Capital / Total Assets

Market Value Equity Ratio: Market Capitalization / Total Assets

Interest-Bearing Liabilities to Cash Flow: Interest-Bearing Liabilities / Cash Flows Interest Coverage Ratio: Cash Flows / Interest Payments (Note) 1. The above indices have been calculated using consolidated financial figures.

- 2. Market Capitalization: Closing Share Price at Year End \times Total Shares Issued and Outstanding at Year End
- 3. Cash Flows used are Cash Flows from Operating Activities.

4. Interest-Bearing Liabilities are all consolidated liabilities from the Balance Sheet for which interest is being paid.

5. Interest Payments is the amount of interest paid from the Statement of Cash Flows.

(3) Our Basic Policy regarding Profit Distribution, Dividends for this current and next Period

The SK-Electronics Group believes that sharing Group profits with our shareholders is one of our most important management concerns, and our Basic Policy is to implement consistent profit distributions to our shareholders, in proper consideration of changes in the operating results of the Group. We will declare dividends in light of the availability of internal funds required for investment in equipment and research and development to expand our business, and our projections of future operating results, etc.

Given the precipitous decline in the business environment and a net loss recorded by the Group for the consolidated fiscal year under review, Group management has made the decision to suspend year-end dividend payments for this fiscal year.

Distribution of retained earnings for the next fiscal year (FYE September 2010) is expected to be 800 per share, in conformance to our Basic Policy regarding Profit Distribution.

- 3. Management policy
 - (1) Basic Company Management Policies

The guiding management policy of the Company is "Creation and Harmony." Our goal is to be a Company that pursues harmony among business, society, nature and people, contributing to an abundant society, both physically and spiritually, through the creation of beneficial products that meet society's needs.

Our Company aims to build a management structure capable of building continued growth and revenues through the effective utilization of internal and external management resources, responding quickly and appropriately to environmental changes in the rapidly growing Electronics Industry. At the same time, we also wish to contribute to society as a socially valuable technology company that plays a significant role in the fine-technology based electronics industry.

| | FYE 9/2007 | FYE 9/2008 | FYE 9/2009 | Target |
|------------------------------------------------------------------------------------|------------|------------|------------|---------|
| Net Sales to Ordinary Income Ratio <profitability indicator=""></profitability> | 0.7% | 5.2% | -4.7% | <10.0% |
| Equity Ratio <safety indicator=""></safety> | 44.4% | 44.0% | 27.5% | < 40.0% |
| Net Sales to R&D Cost Ratio <new development="" indicator=""></new> | 1.5% | 1.4% | 2.1% | 5.0% |

(2) Objectives and Management Performance Indicators

The main performance indicators targeted by the SK-Electronics Group are as follows:

*The indicators above are calculated based on consolidated financial figures.

- *Regarding "Net Sales to Ordinary Income Ratio" (a profitability indicator): While the SK-Electronics Group has not achieved its target due to intensified competition in the market and depreciation associated with Shiga Plant capital investment, we are focusing on profitability improvements through reductions in materials and other costs and improved added value through differentiation.
- *Regarding "Equity Ratio" (a safety indicator): Although capital investment during FY 2009 and continued investment coordinated with market trends has resulted in our achieving target level in this category, we will continue to improve these figures through the repayment of interest-bearing debt from cash flow from operating activities, as well as by considering various capital procurement methods such as raising funds from capital markets, etc.
- *We use the "Net Sales to R&D Cost Ratio" which is an indicator of new development, to determine whether we are actively developing new technology necessary for the continued growth of our company. At the present time, we have not yet reached the target level, but we will continue to focus our efforts to achieve the target level in the future.
- (3) Mid- and Long-Term Management Strategy and Important Issues
 - The environment surrounding the Company Group's Comprehensive Large-Format Photomask Business is extremely difficult at present, with liquid crystal panel manufacturers demanding continued price cuts in photomask unit prices and increased price competition among Company competitors. Given this environment, the SK-Electronics Group has been the first in the world to put a next-generation large-format photomask manufacturing plant ("Shiga Plant") into full operation. To secure our standing among top manufacturers, the SK-Electronics Group has been practicing "Speedy Management," as well as coming together in a united front to address the following three issues, guided by our mantra to "create future value through wisdom and passion."

(1) Rapid Build-Up of our Next-Generation Large-Format Photomask Business

As indicated by the full-scale mass production beginning in October 2009 at the Sharp Corporation 10th-generation large-format panel plant (Sakai City, Osaka) and other developments, demand for large-format panels by LCD panel makers is expected to increase. To respond to this demand, the SK-Electronics Group will make the most of our first-mover advantage offered by our next-generation large-format photomask manufacturing plant ("Shiga Plant"), which began full operations in March 2009. We plan to reach profitability well in excess of our competition, realizing a rapid build-up in our next-generation large-format photomask business.

(2)Profitability Improvements in the Comprehensive Large-Format Photomask Business

In our current comprehensive large-format photomask business (8th-generation and older photomasks), we will be incorporating stronger marketing that responds quickly to capital investment and production trends among LCD panel manufacturers, including those in the Chinese market—expected to be a growth market in the future. Internally, we are promoting stronger profitability through productivity improvements, fixed cost reductions, and materials procurement cost reductions—all areas that will help us meet demands for lower photomask unit costs and increased price competition.

(3)Early Commercialization of New Business Segments

Projections indicate that the Comprehensive Large-Format Photomask Business will experience increased demand for large-format panels, driven by the liquid crystal television market; however, it appears from a long-term perspective that the market is steadily reaching a stage of maturity, with slowing growth rates. For the Company Group to achieve continuing growth, we must construct business segments that will become new pillars of revenue in as early a time frame as possible. The Company is studying internal research and development, the adoption of external technologies, and other initiatives across a wide range, aiming for early business commercialization by engaging in the efficient focus of management resources.

(4) Internal Management Structure Development/ Operations

A discussion of this topic can be found in our corporate governance report, "Basic Philosophies regarding Internal Control Systems and the State of their Effectiveness."

Cost Calculation Method

Under a job-order costing system, Raw Materials Expense is calculated at actual cost, while the manufacturing cost for other expenses is calculated according to projected costs, with the difference between actual cost and projected cost allocated to Inventory and/ or Cost of Sales at the end of the period.
